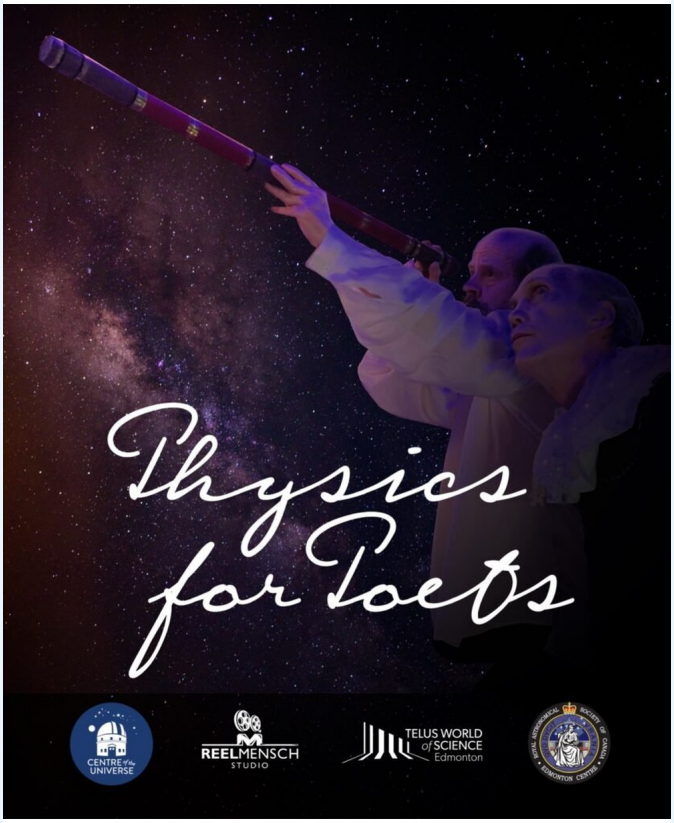
SCIENCE & CULTURE



Physics for Poets

2026 · 83m · Gina Payzant

Set against the backdrop of the Scientific Revolution, Physics for Poets tells the compelling story of Galileo Galilei as he confronts the powerful forces of religious authority, scientific discovery, and personal conviction. Facing trial by the Roman Inquisition for challenging the belief that Earth is the centre of the universe, Galileo must choose between defending his discoveries and protecting his own life. Through thought-provoking dialogue and historical drama, the film explores the enduring conflict between faith and reason, the pursuit of truth, and the moral responsibilities of science. Physics for Poets is a timely reflection on intellectual freedom, scientific progress, and the courage to challenge accepted beliefs.

Rights available worldwide for theatrical, non-theatrical, broadcast, streaming, VOD and FAST.
